Alpha[®]

PLASTICS MADE PERFECT!

www.polarplastic.ca

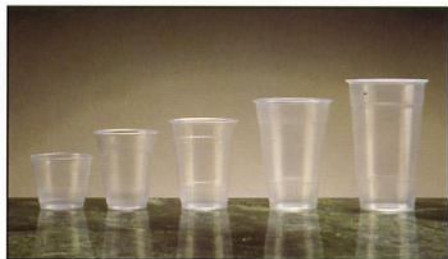

Polar Alpha is your clearer alternative for economical cold drink cups.

Continuing a tradition of industry-breaking achievements with Polar's "strength- through-design," we introduced Alpha as a clearer, yet cost-competitive alternative to translucent polystyrene cups. Alpha represents superior performance and value together in one cup.

To offer the perfect combination of economy and strength, Alpha polypropylene cups are made using state-of-the-art thermoforming technology.

Odorless, safe, and break-resistant, Alpha cups feature "contact clarity," allowing liquid contents to be viewed clearly, while translucent cups do not.

Available in sizes ranging from 3.5 oz. to 32 oz. with a full complement of flat and domed lids, Alpha meets virtually every beverage portion requirement. Alpha is also printable up to six colors to promote branding and name recognition.

ITEM #	DESCRIPTION	CASE PACK	LID FIT
